#### REPORT OF RCRA COMPLIANCE INSPECTION

AT

PCB, INCORPORATED 2100 Wyandotte Kansas City, Missouri

EPA ID NUMBER: MOD98063304

ON

APRIL 3, 1987

BY

U.S. ENVIRONMENTAL PROTECTION AGENCY
Region VII
Environmental Services Division

#### INTRODUCTION

At the request of the Waste Management Division, a RCRA compliance evaluation inspection was performed at PCB, Inc., in Kansas City, Missouri on April 3, 1987. The inspection was conducted under the authority of Section 3007 of the Resource Conservation and Recovery Act (RCRA), as amended. This narrative report and attachments present the results of the inspection.

#### **PARTICIPANTS**

PCB, Inc.:
Anthony Schamel, President

Missouri Department of Natural Resources (MDNR):
John Schofield, Environmental Specialist, Kansas City Regional Office

U.S. Environmental Protection Agency (EPA):
Marilyn J. Mattione, Environmental Engineer, Inspector

#### INSPECTION PROCEDURES

Upon arrival at the facility's office in the 2100 Wyandotte building, I contacted Anthony Schamel. I presented my credentials to Mr. Schamel and explained the purpose of the inspection and the procedures I would follow. The inspection consisted of a discussion of facility operations, waste generation and waste management practices, a visual inspection of the waste management areas, and a review of waste management records. At the end of the inspection, a RCRA Confidentiality Notice was provided to and signed by Mr. Schamel. A copy of this document is provided as Attachment 1. Photographs taken at the facility were claimed as confidential. During the inspection, photocopies of records pertaining to hazardous waste management were obtained. A copy of the document receipt furnished to Mr. Schamel is provided as Attachment 2. I reviewed the findings of

2 the inspection with Mr. Schamel and provided him with a Notice of Violation which he signed as an acknowledgement of receipt. A copy of this document is provided as Attachment 3. FACILITY DESCRIPTION PCB, Inc., accepts capacitors, transformers, oils and other materials contaminated with PCBs for processing prior to disposal. Capacitors are disassembled, drained and their cores shredded. Transformers are drained and flushed. Metal casings are decontaminated with a vapor degreaser. PCB-contaminated wastes are sent off-site for disposal. PCB, Inc., considered a merger with Pollution Control Industries of America (PCIA) in July 1986, but plans were cancelled when the EPA proposed fines against PCB, Inc. Mr. Schamel stated that PCIA was formerly called Chicago Industrial Waste Haulers and/or Missouri Waste Haulers, a firm that operated out at Atlantic Avenue in the Kansas City area. FINDINGS AND OBSERVATIONS 1. PCB, Inc., submitted a Notification of Hazardous Waste Activity on February 7, 1982 as a transporter and a treat/store/dispose facility. EPA removed the TSD status on June 21, 1982. 2. The building at 2100 Wyandotte is a seven story warehouse. PCB, Inc., has operations on the first, third, sixth and seventh floors. The second floor is said to be occupied by Rosse Lithograph, and the fourth floor by Swift Chemical Supply Company. These firms were said to be not affiliated with PCB, Inc., or the building's owner, Ewing Investments. The fifth floor was said to be unoccupied and appeared not to be currently utilized. Mr. Schamel stated St. Luke's Hospital previously used this floor for storage. There are three offices on the first floor. One office is occupied by Aqua Pro Pools, a firm co-owned by Merl Offield and Jack Van Gundy. The other offices are occupied by PCB, Inc. employees. The first floor stores drums labeled as PCB materials. The third floor houses the lab, capacitor processing equipment, the vapor degreaser, and presently stores what is said to be processed material that contains PCBs. The sixth and seventh floors store PCB materials, processed and unprocessed PCB capacitors, and drums of PCB contaminated oil. 3. PCB Inc.'s, operating permit expired in February 1987 and the facility was not actively operating at the time of the inspection. PCB wastes were last accepted on-site on March 7, 1987. All materials currently stored will be off-site by June 1, 1987. 4. Mr. Schamel stated that the firm does not handle RCRA regulated materials. All incoming material was said to be subject to PCB regulation. Occasionally, oil containing less than 50 ppm PCBs is accepted on-site and is used to flush highly contaminated transformers. The vapor degreaser uses 1,1,1-trichloroethane (TCE) to decontaminate metal casings. After

degreasing, the casings are tested and, if less than 2 ppm PCBs, the casings are sent to Osage Metal in the Kansas City area. The TCE is reused in the degreaser until it is heavily contaminated with PCBs. Mr. Schamel stated that the degreaser was used from September 1983 through February 1987 and was cleaned out approximately once a week. Approximately a drum of contaminated TCE was generated per cleanout. The waste was mixed with highly contaminated PCB oil from off-site (askarel) and with contaminated oil from the transformer flushing operation. The mixed waste was shipped off-site in bulk loads as "askarel." The loads would go to a PCB incinerator. Manifest records indicate that the Rollins incinerator in Deere Park, Texas is the current destination of liquid PCB wastes. Mr. Schamel stated that no analysis was done to establish the TCE concentration in the waste shipment off-site as the incinerator facility does not need the information.

- 5. According to Mr. Schamel, incoming drums have in the past been reused on-site. As the facility is closing, drums are presently said to be triple-rinsed, put in the vapor degreaser and then sent off-site as scrap to be recycled. Office trash is disposed of by Deffenbaugh Disposal Services.
- The facility has acted as a hazardous waste transporter on at least two occasions (Attachment 4). Pursuant to 40 CFR 263.22(a), the transporter must keep copies of manifests for a period of three years. When asked to produce manifest copies for transported hazardous waste shipments, Mr. Schamel stated that he would check his files. Over twenty minutes later, Mr. Schamel produced two file folders containing photocopies of manifests. There were handwritten notes in each folder stating that the manifest photocopies were provided by United Solvent Services, the generator of the two shipments. Mr. Schamel stated that the photocopies were obtained that morning (April 3). He stated that these were the only hazardous waste shipments transported since January 1986. He explained he was unsure about transporter operations prior to that time. The truck driver, Larry Benton, owned the truck and leased it to PCB, Inc. up until February 24, 1986. Mr. Schamel stated that Mr. Benton has a hauling contract with someone else now, but he can be reached in Kansas City at the following telephone number: 362-9742. He also suggested that Boh Van Horn, former president of PCB, Inc., would be aware of previous shipments. He stated Mr. Van Horn's telephone number is 472-6365. Upon request, Mr. Schamel was unable to produce a Missouri hazardous waste transporter license as required under 10 CSR 25-6.263(2)(A)3.

#### CONCLUSION

The facility generates a spent solvent that is disposed of in a PCB incinerator according to a facility official. The facility has acted as a transporter for at least two shipments of hazardous waste and has not maintained the records required under 40 CFR 263. The facility does not have a Missouri hazardous waste transporter license.

It is possible that EPA will receive public requests for release of the information obtained during inspection of the facility above. Such requests will be handled by EPA in accordance with provisions of the Freedom of Information Act (FDIA), 5 U.S.C. 552; EPA regulations issued thereunder, 40 CFR Part 2; and the Resource Conservation and Recovery Act, Section 3007, as amended. EPA is required to make inspection data available in response to FOIA requests, unless the Administrator of the Agency determines that the data contains information entitled to confidential treatment.

Any or all of the information collected by EPA during the inspection may be claimed confidential, if it relates to trade secrets or commercial of financial matters that you consider to be confidential. If you make claims of confidentiality, EPA will disclose the information only to the extent, and by the means of the procedures set forth in the regulations (cited above) governing EPA's treatment of confidential information. Among other things, the regulations require that the EPA notify you in advance of publicly disclosing any information you have claimed and certified confidential.

To claim information confidential, you must certify that each claimed item meets <u>all</u> of the following criteria:

- 1. Your company has taken measures to protect the confidentiality of the information, and it intends to continue to take such measures.
- 2. The information is not, and has not been, reasonably obtainable without your company's consent by other persons (other than governmental bodies) by use of legitimate means (other than discovery based on a showing of special need in a judicial or quasi-judicial proceeding).
- 3. The information is not publicly available elsewhere.
- 4. Disclosure of the information would cause substantial harm to your company's competitive position.

At the completion of the inspection, you will be given a receipt for all documents, samples, and other materials collected. At that time you may make claims that some or all of the information is confidential and meets the four criteria listed above.

1-1

RCRA/INSPECTION CONFIDENTIALITY NOTICE	Facility
	PCB, Inc

If you are not authorized by your company to make confidentiality claims, this notice will be sent by certified mail, along with the receipt for documents, samples, and other materials, to the Owner. Operator, or Agent in Charge of your firm, within two days of this date. That person must return a statement, specifying any information which should receive confidential treatment.

This statement from the Owner, Operator, or Agent in Charge should be addressed to:

> Mr. David A. Wagoner Director, Waste Management Division United States Environmental Protection Agency 726 Minnesota Avenue Kansas City, Kansas 66101

and mailed by registered, return-receipt requested mail with in seven (7) calendar days of receipt of this Notice.

Failure by your firm to submit a written request that information be treated as confidential, either at the completion of the inspection or by the Owner, Operator, or Agent in charge, within the seven-day period, will be treated by the EPA as a waiver by your company of any claims for confidentiality regarding the inspection data.

To be completed by the facility official receiving this Notice: I have received and read this Notice. Name Title hame Signature ( Date If there is no one on the premises of the facility who is authorized to make business confidentiality claims for the firm, a copy of this Notice and other inspection materials will be sent to the Owner, Operator, or Agent in charge of the company. If there is another company official who should also receive this information, please designate below: Name Address\_\_\_\_\_
